Building a green economy to lift people out of poverty

1. **Recognizing** the United Nations Development Programme (UNDP) working to reduce poverty in all its dimensions having promoted inclusive and sustainable human development,
2. **Keeping in mind** the outcome of the *Rio+20* conference as a chance to act against poverty, address environmental destruction and prepare for the future,
3. **Noting** the ongoing need for governments or aid groups to intervene in the lives of poor families in all countries,
4. **Desiring** that all nations consider developing a sustainable economy and society known as green economy,
5. **Urges** nations to acknowledge poverty as a global issue of priority,
6. **Having considered** the *Kyoto Protocol* as an international treaty that commits state parties to reduce greenhouse gases emissions,
7. **Alarmed** of the effects regarding ecosystem degradation which causes a decrease in goods and services provided by such:
